

ANIVESH GUPTA

B.Tech in CSE @ VIT Vellore | Aspiring Software Developer

 aniveshgupta13579@gmail.com  +91 6289028044  Vellore, India  linkedin.com/in/aniveshgupta
 github.com/AniveshGuptaOfficial

PROFILE

- Enthusiastic CSE student passionate about building user-friendly web applications.
- Skilled in React, JavaScript, and CSS; familiar with Firebase.
- Strong problem-solving skills in programming and data structures.

EDUCATION

B.Tech in Computer Science and Engineering
VIT University, Vellore  2023 – 2027

- Relevant coursework: Data Structures Algorithms, Web Development, Database Systems.

CERTIFICATIONS

- Yantra Central Hackathon, VIT (Feb 2025)
- Web Development Workshop, Alpha Intern (Mar 2025)
- Forests and Their Management, NPTEL (April 2025)
- Data Structures and Algorithms, Infosys Springboard (May 2025)
- Cybersecurity Job Simulation, Deloitte & Forage (Jun 2025)
- Data Science Bootcamp, W3Schools (July 2025)
- Wild Life Ecology, NPTEL (Oct 2025)
- AI Foundations Associate, Oracle (Sep 2025)
- Introduction to Software Engineering, IBM & Coursera (Apr 2026)
- Java Programming for Beginners, IBM & Coursera (Apr 2026)

EXTRACURRICULAR

Competitive Programming
LeetCode & Codeforces

-  2025 – Present
- Solved 100+ problems, improving algorithmic proficiency.
 - The practice focuses on arrays, dynamic programming, and graph problems.

TECHNICAL SKILLS

Data Structures C C++ Java Python JavaScript HTML5 CSS3 React.js Tailwind CSS
Oracle SQL MATLAB Git

TECH INTERESTS

Software Development Web Development Frontend Engineering System Design

SOFT SKILLS

Leadership & Teamwork Problem-Solving Quick Ideation Creativity Reliability Efficiency

HOBBIES

Watching Movies Traveling Drawing Creative Expression Cooking Exploring Cuisines

Hindi ●●●●● Bengali ●●●●● English ●●●●● Spanish ●●●●●

PROJECTS

Portfolio Website

Personal Project

📅 2024

- Developed a responsive portfolio using React and Material-UI.
 - Showcases personal projects and technical skills.
 - Deployed on Vercel and optimized for fast load times.
-

Books4MU

Personal Project

📅 In Progress

- Created a university book-sharing platform with HTML, CSS, and JavaScript.
 - Adding features such as reviews and search functionality.
 - The purpose of this project is to help students easily share and discover course books.
-

Multiplayer Chess Game

Personal Project

📅 In Progress

- Built a web-based chess game with standard rules.
 - Implementing real-time multiplayer using Web Sockets.
 - Includes move validation and turn-based game flow.
-

VTrade: University E-Commerce & Delivery Platform

Personal Project

📅 In Progress

- Designed a university-centric e-commerce platform for VIT students combining normal shopping, a second-hand marketplace, and a campus pickup service.
 - Implemented architecture with React + Tailwind CSS front end and Node.js/Express back end, covering ERD, DFDs, state machines, use cases, and deployment models.
 - Defined security and trust features that include OTP-based verification, escrow payments, blacklist system, dispute handling, and geofence-based delivery confirmation.
 - Planned Agile incremental delivery with clearly scoped modules (shopping, worker assignment, pickup service, marketplace) and detailed WBS and test cases.
-

Real-Time Sign Language Recognition System

Personal Project

📅 2026

- Built a real-time sign language recognition system that converts webcam-captured hand gestures into text and speech as a low-cost assistive communication tool.
 - Used MediaPipe Hands to extract 21 hand landmarks per frame and engineered a 42-dimensional normalized feature vector for each sign.
 - Trained an SVM classifier with RBF kernel on a custom dataset (36 classes, 7,200 samples) achieving 92–96% validation accuracy for static one-hand signs.
 - Developed both a desktop app (OpenCV + pytsx3) and a FastAPI-based web app with browser webcam streaming, sentence formation controls, and text-to-speech output.
-
